## ***We Don't Install Tapered Insulation Systems, We Make Tapered Insulation Systems Easier To Install***

Mid – Atlantic Foam’s objective was to determine what reduces your production and profit when installing Tapered Insulation Systems. We believe we found the answers and are excited to offer the below products.

Unlike other manufacturers, Mid – Atlantic Foam will offer all of our *PRE-CUTS* in Expanded Polystyrene, Extruded Polystyrene, Polyisocyanurate, Perlite and Fiberboard.

### **Factory *PRE-CUT* Crickets – 45 Degree Hinged Miter Blocks – Sumps**

#### **Features**

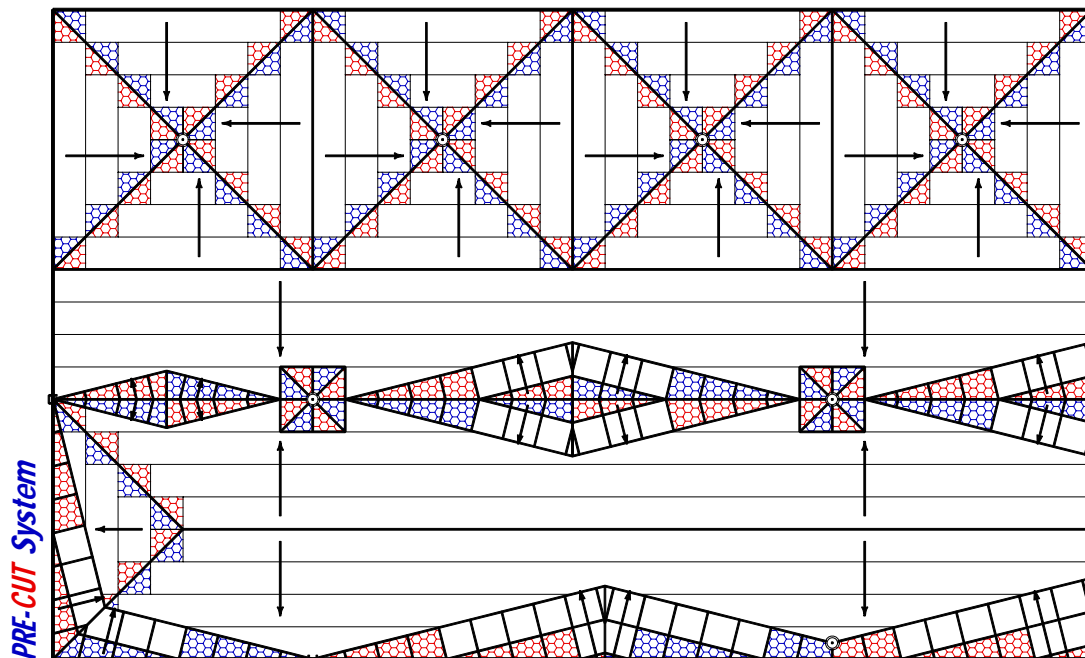

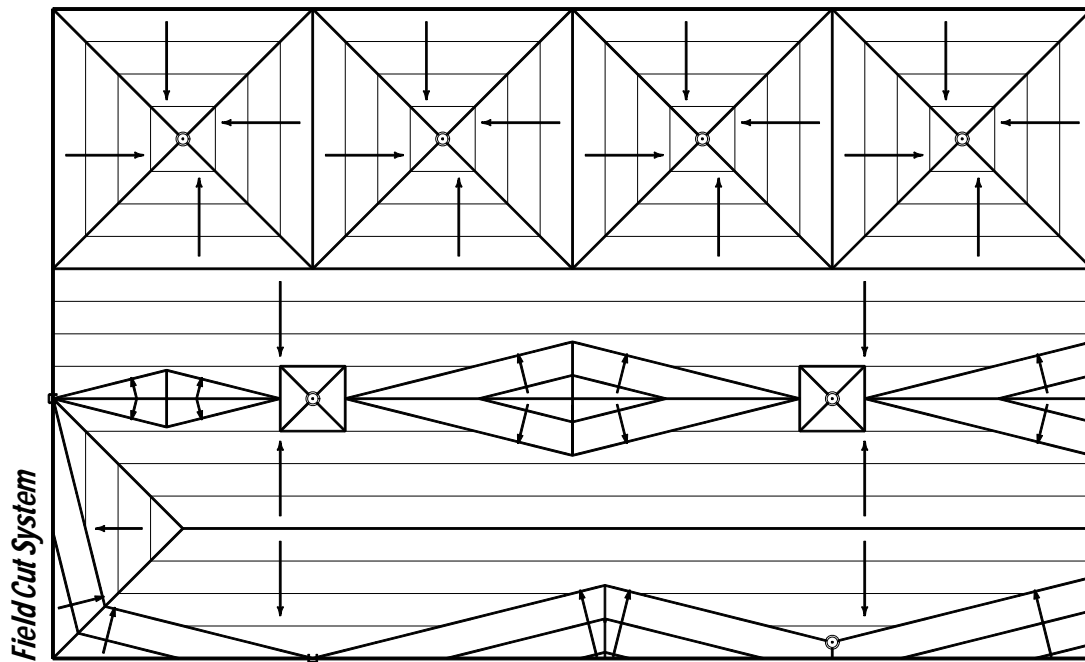

- Available in Expanded Polystyrene, Extruded Polystyrene, Polyisocyanurate, Perlite and Fiberboard
- *PRE-CUT* cricket panels designed to be interchangeable with all types of crickets
- Easy installation. No perimeter chalk lines needed to install *PRE-CUT* Crickets
- Release tape hinge on *PRE-CUT* Crickets, Sumps and Miter Block panels eliminate spot adhesive attachment
- The release tape hinge also allows you to install both sides of the cricket at once
- Customized packaging and labeling for easy installation
- Computerized drawings
- Features may vary by product

#### **Benefits**

- Increase production
- Less installation time
- Reduce labor cost – less skilled labor required to install
- Reduce Crane time – less material to unload
- Reduce landfill disposal cost
- Save 35% to 40% in squares to handle
- Reduce clean up time
